

PGL Series Power Gas Furnace

Power Gas Furnaces

The PGL Series Power Gas Furnaces are designed for indoor installations to meet a wide range of residential/light commercial indoor comfort needs. The PGL Series offers Thermo Pride's Octatherm™ advantage. This time-tested eight-sided heat exchanger design is the heart of Thermo Pride's reputation for high efficiency, reliability and durability. This design forces flue gases into a high rate of agitation as they pass through the heat exchanger. This increases heat transfer and efficiency, resulting in a more uniform surface heating. The heat exchanger is fabricated of 13-gauge copper coated steel. The copper coating helps prevent corrosion and promotes the best heat transfer.

- **Inputs from 180,000 to 250,000 BTUH**
- **Available from 2.5 through 10 tons of cooling capacity**
- **Peace of Mind Warranty - Limited Lifetime Warranty on heat exchanger extended to future home-owners and 10-year parts warranty**
- **Thermo Pride's exclusive "octagonal" design. This design provides better utilization of the effective heating surface and maximizes heat transfer, efficiency and longevity**
- **Rugged 22-gauge metal cabinet design provides the ultimate in durability**
- **Easy maintenance design with inspection ports for easy access to heat exchanger inspection and cleaning**
- **Made in the USA**
